of this page.

# INSTRUCTIONS

SHOWN BELOW ARE THE LATEST CHANGES TO NATIONAL STOCKNUMBERS (NSN) WHICH AFFECT ITEMS IN THE BASIC MANUAL. THE DATA IS ORGANIZED AS FOLLOWS: THE "FROM" COLUMN WILL SHOW THE OLD NSN, IF ONE WERE ASSIGNED. WHERE THE MANUFACTURERS PART NUMBER AND MANUFACTURERS CODE APPEAR IN "FROM" COLUMN REFER TO INDEX FOR LOCATION WITHIN MANUAL. THE "TO" COLUMN SHOWS THE NEW NSN. IN THE "FIG" COLUMN, THE NUMBER OF THE FIGURE WHICH ILLUSTRATES THE ITEM IDENTIFIED BY THE NSN IS SHOWN. THE "ITEM" COLUMN PIN-POINTS THE ITEM NUMBER OF THE SELECTED FIGURE WHICH IS IDENTIFIED BY THE NSN. IF FIGURE AND ITEM NUMBER ARE BLANK REFER TO THE INDEX FOR LOCATION WITHIN MANUAL. THE LAST COLUMN, "TM", IDENTIFIES THE TECHNICAL MANUAL IN WHICH THESE CHANGES SHOULD APPEAR. PENCIL-AND-INK CHANGES MAY BE MADE BY POSTING THE NEW DATA TO THE PARTS LISTINGS AND TO THE INDEX.

FROM	TO	FIG	ITEM	TM

TM 5-4120-308-25P, 24 September 1970 is changed as follows:

The title is changed as shown above.

Page i. Add the following immediately after the "Current as of date"

**REPORTING OF ERRORS**

"You can help to improve this manual by calling attention to errors and by recommending improvements. Your letter, DA Form 2028 (Recommended Changes to Publications), or DA Form 2028-2 (Recommended Changes to Equipment Technical Manuals), may be used. Copies of DA Form 2028-2 are attached in the back of the change for your use. Please mail your recommended changes direct to Commander, US Army Troop Support Command, ATTN: AMSTS-MPP, 4300 Goodfellow Blvd St. Louis, MO 63120. A reply will be furnished direct to you"

Page i. The following Table of Contents line changes apply to the F18T-2 Equipment  
Serials 75036 through 75150:

	Listing Page	Figure No.
SECTION III. REPAIR PARTS FOR ORGANIZATIONAL MAINTENANCE		
Group 01. Casing, guards, grilles and drain tubes	3	1.2
02. Junction box assembly	5	2.1
06. Motor assembly	11	6.1
07. Heater, cable, RFI filter plate and harness assembly	12	7.1
10. Evaporator coil, mist eliminator, valve and piping	13	10.7
	13	10.4
SECTION V. REPAIR PARTS FOR DS, GS, AND DEPOT MAINTENANCE		
Group 01. Casing, guards, grilles, and drain tubes	15	1.2
02. Junction box assembly	24	6.1
06. Motor assembly	24	6.1
07. Heater, cable, RFI filter plate and harness assembly	24	6.1
10. Evaporator coil, mist eliminator, valve and piping	29	10.3
	29	10.4
FEDERAL STOCK NUMBER AND REFERENCE NUMBER INDEX Changes	50A	50D

*Page iii*, paragraph 1. Add the following NOTE after the paragraph title.

**NOTE**

Throughout this manual where the words "Federal Stock Number (FSN)" appears, change to read "National Stock Number (NSN)". Add after the Federal Supply Classification (FSC) two zeros "00", then the remaining numbers.

**EXAMPLE:** FSN 4120-168-1781 becomes NSN 4120-00-168-1791.

*Page vi*, paragraph 7. Add the following:

<i>Code</i>	<i>Manufacturer</i>
10855	Carrier Corp.
12881	Metex Corp.
23939	Captor Corp.
41947	Change: Muller to Mueller
80639	Standard Dayton, Inc.
94833	Keco Industries, Inc.
98939	Fluid Regulator Co.

*Page vi*. Paragraph 8 is rescinded.

*Pages 1 through 47*, Sections II through VI, tabular listings and illustrations are changed. Additions, deletions and modifications are tabulated and illustrated as follows:

6	2-1 a		
81		4-3	
125	line 20		

In line 6 of paragraph 2-1 a manual states the engine has cylinders. The engine on my only has 4 cylinders. Change the manual to show 4 cylinders.

Callout 16 on figure 4-3 is pointing at a bolt. In the key to fig. 4-3, item 16 is called shim. Please correct one or other.

I ordered a gasket, item 19 on figure B-16 by NSN 2910-00-762-3001. I got a gasket but it doesn't fit. Supply says I got what I ordered so the NSN is wrong. Please give me a good NSN.

SECTION VI. SPECIAL TOOLS, TEST AND SUPPORT EQUIPMENT FOR DS, GS, AND DEPOT MAINTENANCE (Not applicable)		
FEDERAL STOCK NUMBER AND REFERENCE NUMBER INDEX	49	

## SECTION I.

### INTRODUCTION

#### 1. Scope

This manual lists repair parts, special tools, test and support equipment required for the performance of organizational, direct support, general support, and depot maintenance of the air conditioner.

#### 2. General

This Repair Parts and Special Tools List is divided into the following sections:

*a. Prescribed Load Allowance (PLA)—Section II.* A composite listing of repair parts, special tools, test and support equipment having quantitative allowances for initial stockage at the organizational level.

*b. Repair Parts—Section III.* A list of repair parts authorized for the performance of maintenance at the organizational level in figure and item number sequence.

*c. Special Tools, Test and Support Equipment—Section IV.* (Not applicable).

*d. Repair Parts—Section V.* A list of repair parts authorized for the performance of maintenance at the direct support, general support, and depot level in figure and item number sequence.

*e. Special Tools, Test and Support Equipment—Section VI.* (Not applicable).

*f. Federal Stock Number and Reference Number Index—Section VII.* A list of Federal stock numbers in ascending numerical sequence, followed by a list of reference numbers appearing in all of the listings, in alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

#### NOTE

Items not illustrated are cross-referenced to assembly group number.

#### 3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in Sections II through IV.

*a. Source, Maintenance and Recoverability Codes (SMR).*

#### NOTE

Common hardware items known to be readily available in Army supply channels are assigned Maintenance codes only. Source codes, Recoverability codes, and Maintenance Allowances are not assigned this category.

(1) Source code indicates the selection status and source for the listed item. Source codes used are:

Code	Explanation
P	Repair parts which are stocked in or supplied from the GSA/DSA, or Army supply system and authorized for use at indicated maintenance categories.
P2	Repair parts which are procured and stocked for insurance purposes because the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
M	Repair parts which are not procured or stocked, but are to be manufactured in indicated maintenance levels.
A	Assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately and can be assembled to form the required assembly at indicated maintenance categories.
X	Parts and assemblies which are not procured or stocked and the mortality of which normally is below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
X1	Repair parts which are not procured or stocked. The requirement of such items will be filled by use of the next higher assembly or component.
X2	Repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain the through cannibalization. Where such repair parts are not obtainable through cannibalization, requirements will be requisited with accompanying justification, through normal supply channels.
C	Repair parts authorized for local procurement. Where such repair parts are not from local procurement channels, they will be requisitioned through normal supply channels.

ance list. Revisions to the range of items authorized will be made by the U. S. Army Mobility Equipment Command based upon engineering experience, demand data, or TAERS information.

*g. Thirty-Day DS/GS Maintenance Allowances.*

#### NOTE

Allowances in GS column are for GS maintenance only.

(1) The allowance columns are divided into three subcolumns. Indicated in each subcolumn, opposite the first appearance of each item, is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the applicable allowance column. To locate the referenced item locate the FSN or reference number in the index. The earliest figure and item number is the referenced item. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for DS/GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipments supported.

(3) To determine allowances when supporting more than 100 of these equipments: First, divide the number of equipment supported by 100 by moving the decimal two places left; second, multiply the result by the quantity in the 51-100 density column. Example, authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

*h. One-Year Allowance Per 100 Equipments/Contingency Planning Purposes.* Indicates opposite the first appearance of each item the total quantity required for distribution and contingency planning purposes. The range of items indicates total quantities of all authorized items required to provide for adequate support of 100 equipments for one year. Subsequent appearances of the same item will have the letters "REF" in the allowance column.

*i. Depot Maintenance Allowance Per 100 Equipments.* Indicates opposite the first appearance of each item the total quantity authorized for depot maintenance of 100 equipments. Subsequent appearances of the same item will have the letters "REF" in the allowance column. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

*j. Illustration.* This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item in the illustration.

#### 4. Special Information

*a.* Repair parts mortality has been based on 7200 hours operation per year.

*b.* Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

*c.* The following publication pertains to the air conditioner and its components:

TM 5-4120-  
308-15

Operator, Organizational, Direct Support, General Support and Depot Maintenance Manual

*d.* The same illustrations are used to illustrate the repair parts and special tools listed in both organizational maintenance section and direct and general support and depot maintenance section.

#### 5. How to Locate Repair Parts

*a.* When Federal stock number or reference number is unknown:

(1) *First.* Using the table of contents, determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the assembly group to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listings find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

*b. When Federal stock number or reference is known:*

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number or reference number. This index is in ascending PSN sequence followed by a list of reference numbers in alphanumeric sequence, cross-referenced to the illustration figure number and item number.

Code	Explanation
	statement of nonavailability from local procurement.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above GS and DS level or returned to depot supply level.

(2) Maintenance code indicates the lowest category of maintenance authorized to install the listed item. The maintenance codes are:

Code	Explanation
O	Organizational maintenance
F	Direct support maintenance
H	General support maintenance
D	Depot maintenance

(3) Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Code	Explanation
R	Applied to repair parts (assemblies and components) which are considered economically repairable at direct and general support maintenance levels. When the maintenance capability to repair these items does not exist, they are normally disposed of at the GS level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
S	Repair parts and assemblies which are economically repairable at DSU and GSU activities and which normally are furnished by supply on an exchange basis. When items are determined by a GSU to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final disposition.
T	High dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts are normally repaired or overhauled at depot maintenance activities.
U	Repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, or high dollar value reusable casing and castings.

*b. Federal Stock Number.* Indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

*c. Description.* Indicates the Federal item name and any additional description of the item required. Assembly components and subassemblies are indented under major assemblies. The abbreviation "w/e" when used as a part of the nomenclature, indicates the Federal stock number,

includes all armament, equipment, accessories, and repair parts issued with the item. A part number or other reference number is followed by the applicable 5-digit Federal supply code for manufacturers in parenthesis. Repair parts quantities included in kits and sets are shown in front of the repair part name. Material required for manufacture or fabrication is identified.

*d. Unit of Measure (U/M).* A 2 character alphabetic abbreviation indicating the amount or quantity of the item upon which the allowances are based, e.g., ft, ea, pr, etc.

*e. Quantity Incorporated in Unit.* Indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

*f. Fifteen-Day Organizational Maintenance Allowance.*

(1) The allowance columns are divided into four subcolumns. Indicated in each subcolumn opposite the first appearance of each item is the total quantity of the items authorized for the number of equipments supported. Subsequent appearances of the same item will have the letters "REF" in the allowance column. To locate the referenced item, locate the FSN or reference number in the index. The earliest figure and item number is the referenced item. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowance for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units authorized additional prescribed loads, multiply the number of prescribed loads by the quantity in the appropriate density column to determine the number of repair parts authorized.

(3) To determine allowances when supporting more than 100 of these equipments: First, divide the number of equipments supported by 100 by moving the decimal two spaces left; second, multiply the result by the quantity in the 51-100 density column. Example, authorized allowance for 51-100 equipments is 12; for 140 equipments, multiply 12 by 1.40 or 16.80 rounded off the 17 parts required.

(4) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded to the U. S. Army Mobility Equipment Command for exception or revision to the allow-

(1) FEDERAL STOCK NUMBER	(2) DESCRIPTION	(3) 15-DAY ORGANIZATIONAL MAINTENANCE ALLOWANCE

(2) *Second.* Using the **Repair Parts Listing**, find the assembly group of the repair part and the illustration figure number and item number referenced in the Index of Federal Stock Numbers and Reference Numbers.

c. When the Federal stock number or reference number is known and the repair part is not illustrated:

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number or reference number in the section titled Items not Illustrated and note the group number. This section is in ascending FSN sequence followed by a list of reference numbers in alpha-numeric sequence, cross-referenced to assembly group number.

(2) *Second.* Using the Table of Contents, locate the assembly group number and page number.

(3) *Third.* Using the applicable group number and page number, locate the pertinent stock number or reference number in the Repair Parts Listing. Items which are not illustrated are listed at the end of the assembly group to which they belong.

## 6. Abbreviations

ac -----alternating current  
cbr -----circuit breaker reset  
rfi -----radio frequency interference

## 7. Federal Supply Codes for Manufacturers

Code	Manufacturer
00779----	Amp Inc.
01479----	Whirlpool Corp.
